365 Cars You Must Drive May 03 2020 What began as a solution for transportation has evolved into a desire for speed, luxury, personal expression, and freedom. For many, the thrill of the drive has eclipsed the pure utility of the automobile. And the pursuit of that thrill is the driving force behind 365 Cars You Must Drive. From the Ford Model T to the Porsche Carrera GT, there are certain cars that any self-respecting auto enthusiast just has to know—and experience from the driver's seat. With homage to the greatest cars and good-natured mockery of the strangest, authors Matt Stone and John Matras detail which cars to drive and why, how to get behind the wheel, where to drive them, and who to invite along for the ride. Each entry contains a colorful spec box noting the car's claim to fame, a Did You Know? factoid, the author's clever suggestions for "The Perfect Passenger" and the "Soundtrack" coming out of the speakers, Behind the Wheel notes, and a "Perfect Drive" for the marque or model covered. Engine details, production information, the price when it debuted and the collectible price now - all of it adds up to at-a-glance fun reading to go with informative essays on each car, archival and full-color photos, and more. Shafted! Everything You Ever Need to Know about the Engine of the Golf Club Sep 30 2022 Do you know how golf began? No? You're not alone - no one does. Make up any story you like. Dutchmen banging balls across frozen canals. Lonely shepherds whacking pebbles up and down Scottish sand dunes. Ancient Romans slugging stuffed leather balls towards Corinthian columns. Take your pick. But every origin story you land on has one thing in common - the game is played with a stick. Today that stick is called a shaft. It is the most important element of the golf club - the only means of imparting energy to the golf ball. The shaft is responsible for the accuracy, distance and trajectory of every golf shot. It is not for nothing that the shaft is called the "engine of the golf club." Like a stock car, you can make all the modifications you want but the best engine is still the favorite to win the race.
