Everbound Jul 28 2022 It's been two months since the dark tunnels of the underworld came for Nikki Beckett. That night, Nikki's boyfriend, Jack, made the ultimate sacrifice and took her place in the Everneath for eternity - a debt that should have been hers. Every night Jack appears in her dreams, lost and confused, and wasting away. Nikki wants to save him before it's too late, but no matter how hard she tries to reach for his hand, she can never find it. Desperate for answers, Nikki turns to Cole, the immortal who wants to make her his Queen - and the one person least likely to help. But it seems Nikki has touched his heart, and surprisingly, Cole agrees to help in the only way he can: taking Nikki to the Everneath himself. As they descend into the heart of the Everneath Nikki and Cole discover that their journey will be more difficult than they could have imagined. More deadly. Nikki vows to stop at nothing to save Jack - even if it means making an incredible sacrifice of her own...

Applied Photographic Optics Apr 24 2022 Selected by the American Library Association's 'Choice' magazine as "best technical book", the first edition of this book established itself as the standard reference work on all aspects of photographic lenses and associated optical systems. This is unsurprising, as Sidney Ray provided a comprehensive reference source for anyone wanting information on photographic lenses, from the student to the practitioner or specialist working with visual imaging worldwide. This third edition has been fully revised and expanded to include the rapid progress in the last decade in optical technology and advances in relevant digital forms of imaging. Every chapter has been revised and expanded using new figures and photographs as appropriate, as well as extended bibliographies. New chapters include details of filters, measurements from images and the optical systems of digital cameras. Details of electronic and digital imaging have been integrated throughout. Information is given on topics such as aspherics, diffractive optics, ED glasses, image stabilization, optical technology, video projection and new types of lenses. The book's contents includes chapters on: optical theory, aberrations, auto focus, lens testing, depth of field, development of photographic lenses, general properties of lenses, telephoto lenses, video lenses, viewfinder systems, camera movements, projection systems and 3-D systems.
