Small Engines and Outdoor Power Equipment Sep 29 2022 This new book is more than a simple engine repair manual. Designed for the beginner with little or no mechanical experience, Small Engines & Outdoor Power Equipment is a graphically appealing, step-by-step guide that covers all of the most important engine maintenance and repair skills you'll need to keep your equipment running at peak performance. It also shows exactly how to perform mechanical upkeep and repairs on the most common outdoor power implements, including lawn mowers, snow blowers, chain saws, power washers, generators, leaf blowers, rototillers, wood splitters, lawn edgers, and weed whips. With clear how-to photos and detailed diagrams, you'll see exactly what needs to be done. A comprehensive troubleshooting guide helps you define problems and enact solutions. With Small Engines & Outdoor Power Equipment in your library, you won't need to haul the lawn mower off to the repair center and wait a few weeks just because a filter is plugged or the old gas needs to be replaced. Among the many skills you'll learn are seasonal tune-ups, changing oil, servicing spark plugs, cleaning filters, replacing a muffler, servicing the fuel tank, overhauling a carburetor, servicing brakes, inspecting a flywheel, replacing a fuel pump, and replacing a rewind cord.

SPS2020 Dec 29 2019 Knowledge-intensive product realization implies embedded intelligence: meaning that if both theoretical and practical knowledge and understanding of a subject is integrated into the design and production processes of products, this will significantly increase added value. This book presents papers accepted for the 9th Swedish Production Symposium (SPS2020), hosted by the School of Engineering, Jönköping University, Sweden, and held online on 7 & 8 October 2020 because of restrictions due to the Corona virus pandemic. The subtitle of the conference was Knowledge Intensive Product Realization in Co-Operation for Future Sustainable Competitiveness. The book contains the 57 papers accepted for presentation at the conference, and these are divided into nine sections which reflect the topics covered: resource efficient production; flexible production; virtual production development; humans in production systems; circular production systems and maintenance; integrated product and production development; advanced and optimized components, materials and manufacturing; digitalization for smart products and services; and responsive and efficient operations and supply chains. In addition, the book presents five special sessions from the symposium: development of changeable and reconfigurable production systems; smart production system design and development; supply chain relocation; management of manufacturing digitalization; and additive manufacturing in the production system. The book will be of interest to all those working in the field of knowledge-intensive product realization.
